

DEOMI

DEFENSE EQUAL OPPORTUNITY MANAGEMENT INSTITUTE

Quarterly News Letter

3rd Quarter, August 2018

DOD's Center of Excellence for Equal Opportunity and Equal Employment Opportunity Training

DEOMI offers Equal Opportunity/Equal Employment Opportunity education and training for military active duty and reservists as well as civilians in both resident and non-resident courses. DEOMI's mission is to enhance readiness from development through delivery of human relations education, training, and innovative solutions for its customers. Currently, DEOMI offers equal opportunity professionals courses on:

EEO Officer

**Mediation Certification
Course**

Disability Program Manager Course

Our Resource Management Information Systems Division has begun a new video series titled

It is a short video series that will focus on the different aspects of DEOMI's mission. The first video depicted EOAC 18-1 and what their experiences were with respect to the first half of training.

The second video was on the latter half of training to include graduation.

Future videos will focus on a number of different themes to include, but not limited to:

- ▶ Production of videos.
- ▶ Academic Standards & Evaluation processes for new instructor personnel.
- ▶ R&D initiatives, STEM & Summer Faculty.
- ▶ Objectives and products, the Observance Poster process and methodology.

These short videos will continue to be posted on our DEOMI web and Facebook pages and also made available to the Armed Forces Network.

DEOMI STEM INTERNS HOLD SYMPOSIUM

The Defense Equal Opportunity Management Institute's Science, Technology, Engineering and Math interns held a local symposium showcasing their work of the last 10 weeks on various STEM-related research projects here recently.

The DEOMI STEM internship program's goal is to encourage high school, college, and graduate-level students to enter into STEM-related careers in the Department of the Navy or the Department of Defense once they have completed their education.

Dr. Dan McDonald, DEOMI's Director of Research and Development had plenty of praise for all involved.

"First, much thanks to the DEOMI Command Staff, faculty and to the Navy for their continued sponsorship and support of this great program."

"Secondly, we all want to give our credit and appreciation to Navy Lieutenant Christopher Rodeheffer and all five of his interns. What an absolutely fabulous performance by all," he said with emphasis.

The application period for 2019 internship spots begins August 20, 2018, and remains open for at least 6 weeks. For more information on how to become a STEM student please visit www.deomi.org/research/research-opp.cfm
